European Journal of Operational Research 71 (1993) 468–469
North-Holland

Contents Volume 71

1 Graph theoretical issues in computer networks (*Invited Review*)
J. Błażewicz, J. Brzeziński and G. Gambosi
17 Analytical loading models in Flexible Manufacturing Systems
N. Kirkavak and C. Dinçer
32 Positioning of automated guided vehicles in a loop layout to improve response time
P.J. Egbelu
45 Entropy of plagues: A measure for assessing the loss of social cohesion due to epidemics
F. Carvalho-Rodrigues, J. Dockery and T. Rodrigues
61 Implied constraints and a unified theory of duality in linear and nonlinear programming
P.K. Johri
70 Estimating the mean completion time of PERT networks with exponentially distributed durations of activities
J. Magott and K. Skudlarski
80 Selecting control variates to estimate multiresponse simulation metamodels
A.M. de O. Porta Nova and J.R. Wilson
95 Valid inequalities and projecting the multicommodity extended formulation for uncapacitated fixed charge network flow problems
R.L. Rardin and L.A. Wolsey
110 Procurement of prescribed sizes: A Markovian approach
D.J. Robb
120 Hardware configuration for StarLAN 10 local area networks: An application of integer programming
E. Rosenberg
130 The multi-level uncapacitated facility location problem is not submodular
A.I. Barros and M. Labbé
133 Book Reviews, *L.F. Gelders (ed.)*

Special Issue Seventh EURO Summer Institute on Urban Traffic Management

151 Editorial
L. Bianco, M. Bielli and M.G. Speranza
154 A unified description of iterative algorithms for traffic equilibria
M. Patriksson
177 The existence of equivalent mathematical programs for certain mixed equilibrium traffic assignment problems
L.D. Bennett
188 A variational inequality formulation of the Dynamic Traffic Assignment Problem
O. Drissi-Kaïtouni
205 Cost versus time equilibrium over a network
F. Leurent
222 Individual controlled junctions: Optimal design
G. Bruno and G. Improta
235 Hierarchical dispatching control of urban traffic systems
A.E. Gegov
247 Knowledge-based system for the completion of traffic data
H. Kirschfink
257 Investment planning for urban roads
M. Christiansen
269 A stochastic user equilibrium assignment model for the evaluation of parking policies
G.N. Bifulco
288 A comparative analysis of different specifications of modal choice models in an urban area
M.N. Postorino
303 State space relaxation for set covering problems related to bus driver scheduling
A. Paias and J. Paixão
317 Integrated optimal flow control in traffic networks
J.C. Moreno Baños, M. Papageorgiou and C. Schäffner

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

325 Ship scheduling: The last decade (*Invited Review*)
D. Ronen
334 Optimal scheduling of a hydro thermal power generation system
P. Oliveira, S. McKee and C. Coles
341 A multiple criteria model for new telecommunication service planning
C.H. Antunes, J.F. Craveirinha and J.N. Clímaco
353 Operating a flexible assembly line: To control the bottleneck
B. Pourbabai
366 Openshops with jobs overlap
E. Wagneur and C. Sriskandarajah
379 A goal-programming method of stochastic allocative data envelopment analysis
D.L. Retzlaff-Roberts and R.C. Morey
398 A model management solution system for multicommodity network flows
A.R. Lari and B.N. Nag
419 Dynamic equilibria in transport systems
V. Sever
439 Equilibria in a stochastic resource management game under imperfect information
V. Kaitala
454 Conditions for government support of private research and development
K. Brockhoff and K. Warschkow
463 OR Software
ORSEP–Operations Research Software Exchange Program, *H.W. Hamacher (ed.) A new on-line scheduling heuristic, G.J. Woeginger*

465 OR Software, *H. Thiriez (ed.)*
467 Call for papers
468 Contents Volume 71
470 Acknowledgement to Referees
471 Invited Reviews 1989–1993
473 Keyword Index Volumes 84–71
479 Author Index Volumes 64–71
491 Book Review Index Volumes 64–71
